

NIKHIL WAGHMARE

Full Stack MERN Developer

+91-9860850969 | wnikhil001@gmail.com | Pune, Maharashtra

PROFESSIONAL SUMMARY

MERN Stack Developer with 3.5+ years of experience designing and developing scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in REST API development, authentication, cloud deployment, and performance optimization with hands-on experience delivering enterprise and product-based solutions.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, NestJS, REST APIs, WebSocket, WebRTC, OAuth 2.0.

Databases: MongoDB, Mongoose, SQL Server, Relational DB Concepts, PostgreSQL.

Frameworks/Architecture: MERN Stack, React Native, Microservices, MVC Architecture, RESTful APIs, JWT Authentication, OAuth 2.0, SOLID Principles.

Cloud & DevOps: AWS (EC2, S3), Docker, Kubernetes, Nginx, CI/CD Pipelines.

State Management: React Hooks, Context API.

Testing & Tools: Jest, Postman, Git, GitHub Actions, Ubuntu, ChatGPT.

Methodologies: Agile, Scrum, SDLC, Sprint Planning, Code Reviews.

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Globalion Technology Solutions Pvt.Ltd., Pune

Oct 2023 – Present

- **Developed and maintained** multiple responsive e-commerce applications using the MERN stack, achieving a seamless cross-device user experience.
- **Architected admin and user dashboards** utilizing React Hooks and Tailwind CSS, optimizing state management and improving frontend rendering speed.
- **Integrated RESTful APIs** and third-party payment gateways with robust error-handling protocols, reducing transaction-related issues by 45%.
- **Engineered modular UI components** in collaboration with UI/UX design teams, ensuring brand consistency and high usability standards.

MERN Stack Developer | COREMAGIX SOFTWARE Pvt.Ltd., Pune

Jun 2022 – Aug 2023

- Built and deployed 5+ full-stack **MERN** applications, reducing manual operational workflows by 50% through process **automation**.
- Developed secure **REST APIs** with **JWT**-based authentication and role-based authorization.
- Optimized **MongoDB** schemas and queries, improving backend performance significantly.
- Collaborated in Agile sprints using **Git** and **GitHub**, conducting regular code reviews via Postman.

PROJECT EXPERIENCE

Project 1: Loan Management System

Role: MERN Stack Developer (React.js, Node.js, Express.js, MongoDB).

Project Description: Developed a full-stack **Loan Management System** to automate the **complete loan lifecycle**, including application submission, approval workflows, disbursement, **EMI calculations**, and **repayment tracking**. Improved operational efficiency by reducing manual processing time and minimizing errors through scalable web architecture.

Key Contributions:

- **Developed backend** services using Node.js and Express.js to manage loan applications, approvals, EMI calculations, and repayment workflows.
- **Designed** and optimized **MongoDB** schemas for customer profiles, loan records, payment schedules, and transaction history, improving query performance and scalability.
- **Built RESTful APIs** for loan applications, repayment management, status tracking, and financial reporting.
- **Developed** responsive user interfaces and dashboards using React.js for customers, loan officers, and administrators.
- **Implemented** form validation, error handling, authentication, and role-based access control to ensure security and reliability.
- **Integrated** centralized logging and exception management for improved system monitoring and debugging.
- **Conducted** unit and integration testing using Jest/Postman and collaborated with QA teams for end-to-end testing.

Project 2: AI Credit Card Fraud Detection System

Project Description: Developed a real-time Credit Card Fraud Detection System to monitor transaction activity, detect suspicious behaviour using rule-based validation and historical pattern analysis, and generate instant alerts for fraud prevention.

Key Responsibilities:

- **Developed** backend modules using Node.js and Express.js for transaction processing, fraud detection, alert generation, and reporting.
- **Designed** scalable MongoDB schemas to store and analyze high-volume transaction and customer behaviour data efficiently.
- **Built RESTful APIs** for transaction validation, fraud scoring, suspicious activity alerts, and reporting dashboards.
- **Created** React.js **dashboards** for fraud analysts to monitor real-time transactions, flagged activities, and investigation workflows.
- Implemented automated **email/SMS** notification systems for suspicious transaction alerts.
- Added **authentication, authorization, validation**, and performance optimization for secure financial operations.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Framer Motion, JavaScript (ES6+), REST APIs.

EDUCATION

Bachelor of Computer Science

Rajarshi Shahu (Autonomous) Mahavidyalaya, Latur.

Graduated: 2022.
